

Name: Stefan Wrobel

Class of works: I am writing in support of Class #2 (DVD Region Coding):  
Audiovisual works stored on Digital Versatile Disks ("DVDs") that are not  
available in Region 1 DVD format and access to which is prevented by  
technological measures.

Summary:

Disc name: Futurama

The Futurama DVD set is only available in Europe (Region 2) and will not play on unmodified US (Region 1) DVD players. Without modification, when inserted, the discs will cause an error stating that the disc cannot be played in this player because of a region conflict. I can't understand to this day the logic behind this limitation, but it is very frustrating not to be able to use a product I have legally purchased from the UK in my US DVD player.
